

RECOVER, RECYCLE, REUSE

MANAGEMENT OF TREATED WOOD

Treated wood

Who we are

How we work

Wood coated with chemical
preservatives

C & D : Industrial

A RETURN FOR THE FUTUR

Treated wood users

Railroad, Public utility, Security etc...

Phytoremediation

Water capture

Water treatment

A sane and safe solution

Sane

Which takes into account the longevity options available

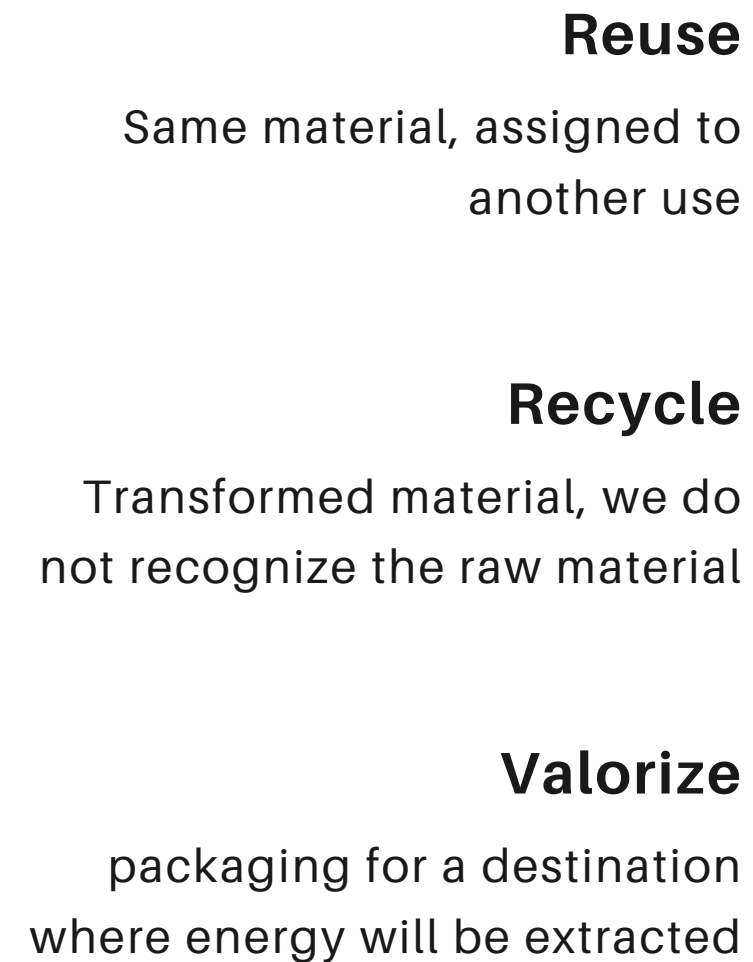

Safe

Management with useful and necessary precautions, in connection with the quality of the environment.

Who we are

Specialist of useful life extension

How we work

ACTIONS HIERARCHY

Reuse

Same material, assigned to another use

Recycle

Transformed material, we do not recognize the raw material

Conditioning

packaging for valuation
(where energy will be extracted)

If material
can have a
second life,
no other
option will be
considered.

Strict respect for the management hierarchy

***"There are so many good reasons
to extend the life of wood"***

MassDEP

Date	Scale Slip	Departure	Arrival	Carrier	Total Weight (kg)	Total Weight (t)	Material	Re-employment		Recycling		Recovery	
								Rate (%)	Weight (t)	Rate (%)	Weight (t)	Rate (%)	Weight (t)
2023/01/10	44**	Massachusett	Tred'si	XXX	24985	24,985	Long poles	60,00%	14,99	20,00%	4,99	20,00%	4,99
2023-01-11	45**	Massachusett	Tred'si	XXX	23000	23	Railroad tie	40,00%	9,2	0,00%	0	60,00%	13,8
						0		0,00%	0,00	0,00%	0,00	0,00%	0,00
						0		0,00%	0,00	0,00%	0,00	0,00%	0,00
					Total	47,985			24,19		4,99		55,2
Green gas emission (equivalent tons)													
Emissions for reused and recycled material (Kg CO2e)		0,0											
Emissions if the material was recovered for energy (Kg CO2e)		965,9		Green gas emissions TCO2eq									
Emissions if the material was landfilled (Kg CO2e)		137956,9		138,92									

Transparency

An easy and safe solution

For leaders users

By leaders of circular economy
